## Stage 5: Evaluation

**Realizado por:**

43323, Pedro Fernandes

43367, Miguel Anciães

43368, Ricardo Amaral

43914, João Reis

**Lab class Nº** P1, P2, P4

**Professor:**

Teresa Romão

**November 30, 2018**

Nº	Problem	Heuristic	Description	Severity	Solution
1	Missing interaction	Flexibility and Efficiency of Use	Clicking on the Home Board logo, we are redirected to its correspondent view, where we can see a list off all our tasks and events separated by day/week and month. We noticed that it's not possible to access the details of a task/event, like the description and participants by clicking on it.	Minor	Allow a popup to appear when we hover the mouse on top of the task/list with all the necessary info.

Terça-feira

20:00 - 22:00 Ver a bola

Could allow to enter the task/event on click.

Nº	Problem	Heuristic	Description	Severity	Solution
2	Missing button	User Control and Freedom	Clicking on the Debts tab, we are redirected to its correspondent view, where we can see who owns us money and to whom we own money. Pressing the see more button (Ver) for a specific person we are redirected to a more detailed view about the debts that we have with that person. Unfortunately, it does not exist an option to go back to the previous screen.	Major	Add a button in the interface that allows the user to go back to the previous screen.

3	Missing functionality	Recognition, Not Recall	Clicking on the Debts tab, we are redirected to its correspondent view, where we can see who owns us money and to whom we own money. Pressing the see more button (Ver) for a specific person we are redirected to a more detailed view about the debts that we have with that person. Clicking the confirm (Confirmar) button, triggers a popup message asking us if we want to confirm the payment of a debt. After we confirm the payment, it is reported back to us that the debt was archived. When we tried to access our archived debt, we observed that the functionality did not exist.	Major	Add a tab that allows the user to check its archived debts.

4	Missing interaction	Flexibility and Efficiency of Use	Clicking on the Calendar tab, we are redirected to its correspondent view, where we can see a calendar with all our tasks/events separated by day/week/month. Unfortunately, it does not allow to create a new task/event when we click on a day of the calendar.	Minor	Allow a click on the calendar to redirect to a view that allows the user to create a new task/event on the chosen day.

Could allow the user to create a task or event after selecting a day of the calendar

Nº	Problem	Heuristic	Description	Severity	Solution
5	Colors contrast	Aesthetic and Minimalist Design	Clicking on the Calendar tab, we are redirected to its correspondent view, where we can see a calendar with all our events/tasks separated by day/week/month. After pressing the day tab (Dia) we are presented with its correspondent view. The contrast between some colors and their background caused us some reading and understanding problems.	Major	Try to darken the colors used to signal the task/events and their correspondent text or darken the calendar.

7	Missing labels	Recognition, Not Recall	Clicking on the Calendar tab, we are redirected to its correspondent view, where we can see a calendar with all our tasks/events separated by day/week/month. When we observe the calendar, we can see that it becomes difficult to distinguish between a task and an event.	Major	Use color and text labeling to identify what is a task and what is an event.

8	Error prone	Error prevention	Clicking on the Create Task tab, we are redirected to its correspondent view, where we can see a form with all the required fields to create a new task. After filling the form we can observe that it allows the creation of a new task where the end date is smaller than the creation date.	Major	Validate user input, so that if errors like this happen, the user can be alerted about the situation.
